PREFACE.

THE Collection described in this catalogue will be found to contain a number of coins which, it is believed, have never before been offered for sale. Among these may be mentioned the Henry IV or V Penny of a hitherto unknown type; the Henry VI Calais Penny of the annulet-rosette issue; the Henry VII Groat, with mint-mark sun and rose dimidiated; the Henry VIII Half-Groats, (*a*) with mint-mark sunburst, (*b*) with Irish title; the Edward VI Half-Groat, with mint-mark *t*; the Shilling of the 8 oz. fine third coinage of Durham House mint, and the fourth coinage Shilling, with mint-mark pheon; the Charles I Shillings of *Briot's Tower type* of the issue corresponding with the recently discovered Half-Crowns of similar type and workmanship, and the Sixpence of the Tower issue (lot 310).

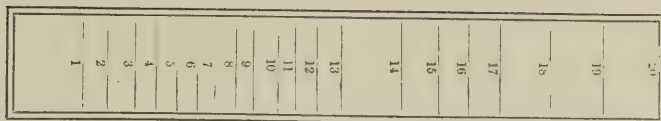

The better known rarities of the period covered by the Collection will also be found to be amply represented, and include, among many others, Pattern Groats of Edward I; Roman *m* Groats, and the very much rarer Roman *m* Half-Groat of Edward III; Farthings of Richard II, Henry V and Henry VI; heavy coinage London Penny of Henry IV; heavy coinage London Half-Groat of Edward IV; Henry VI Restoration London Halfpenny; Edward V Halfpenny; Richard III London Half-Groat; a very fine series of Testoons of Henry VIII and Edward VI; Tournay Groats of French and English workmanship, the latter probably "the finest known"; what is believed to be the most comprehensive series of Three-Halfpenny Pieces of Elizabeth yet formed; the milled Sixpence of 1566 of the same monarch, and many unpublished pieces of the Tower Coinages of Elizabeth, James I, Charles I and the Commonwealth, the smaller pieces being particularly complete; Charles I Aberystwith Halfpenny; Bristol Three-pence; Combe-Martin Half-Groat; Oxford Crown and Penny, etc.

The following lots should, perhaps, be especially noticed:—1, 2, 3, 7, 10, 11, 12, 15, 16, 17, 18, 19, 20, 22, 23, 27, 28, 31, 35, 36, 43,

* * Of this remarkable piece the proprietor remarks: "The obverse die from which this coin is struck seems originally to have been prepared for the earliest issue (1351) with open E's and C's and Roman M's. Being made to serve again in the rare later issue with lis on the king's breast, by having this emblem punched into the die over the ordinary fleur on the breast arch; and being again altered to serve in yet a third issue by having an annulet added in the spandril below the bust. A remarkable example of die economy."
